

CONTENTS

CHAPTER 1: CONCEPTS OF MEASUREMENTS

1.1	Introduction.....	1.1
1.1.1	Methods of measurement.....	1.1
1.1.2	Types of measurement.....	1.2
1.1.3	Units of measurement system.....	1.3
1.2	Instruments.....	1.4
1.2.1	Classification of instruments.....	1.5
1.2.2	Functional classification of instruments.....	1.6
1.3	Applications of Measurement Systems.....	1.6
1.3.1	Monitoring of processes and operations.....	1.7
1.3.2	Control of processes and operations.....	1.7
1.3.3	Experimental engineering analysis.....	1.8
1.4	Elements Of A Generalised Measurement System.....	1.8
1.4.1	Primary sensing element.....	1.9
1.4.2	Variable conversion element.....	1.9
1.4.3	Variable manipulation element.....	1.9
1.4.4	Data transmission element.....	1.10
1.4.5	Data presentation element.....	1.10
1.5	Static And Dynamic Characteristics Of An Instrument.....	1.12
1.5.1	Static characteristics.....	1.12
1.5.2	Dynamic characteristics.....	1.15
1.6	Dynamic Analysis.....	1.17
1.6.1	Time domain analysis.....	1.18
1.6.2	Frequency domain analysis.....	1.21
1.7	Dynamic Response Of An Instrument.....	1.22
1.7.1	First-order instrument:.....	1.23
1.7.2	Second-order instrument.....	1.27
1.8	Errors In Measurement.....	1.29
1.8.1	Gross error.....	1.29
1.8.2	Systematic error.....	1.30
1.8.3	Random error.....	1.32

1.9	Statistical Evaluation Of Measurement Data:.....	1.33
1.10	Standards And Calibration:	1.36
1.10.1	Standards of measurement	1.36
1.10.2	Calibration.....	1.37
	Short Questions And Answers	1.59
	Review Questions	1.73
	Unsolved Problems	1.75

CHAPTER 2: MEASUREMENT OF PARAMETERS IN ELECTRICAL SYSTEMS

2.1	Analog Instruments	2.1
2.1.1	Principle of operation of analog instruments	2.2
2.1.2	Operating forces of indicating instruments.....	2.4
2.1.3	Controlling system	2.5
2.1.4	Damping system.....	2.9
2.2	Classification Of Analog Instruments	2.12
2.2.1	Permanent Magnet Moving Coil Instruments (PMMC).....	2.13
2.2.2	Moving Iron Instruments (MI).....	2.18
2.2.3	Basic Meter Configurations.....	2.25
2.3	Electrodynamometer Type Wattmeter.....	2.37
2.3.1	Single phase power measurement	2.38
2.3.2	Low power factor wattmeter.....	2.43
2.3.3	Three phase power measurement	2.44
2.4	Induction Type Energy Meter	2.54
2.4.1	Single phase energymeter	2.54
2.4.2	Poly phase energy meter.....	2.60
2.5	Megger.....	2.63
2.6	Instrument Transformers	2.65
2.6.1	Current Transformer (C.T)	2.65
2.6.2	Potential Transformer (P.T)	2.67
2.6.3	Measurement of power using C.T and P.T.....	2.68
2.6.4	Measurement of energy using C.T and P.T	2.68
2.6.5	Errors in the instrument transformer	2.70
	Short Questions And Answers	2.74
	Review Questions	2.85

CHAPTER 3: AC/DC BRIDGES AND INSTRUMENTATION AMPLIFIERS

3.1	Bridges.....	3.1
3.1.1	Types of bridge.....	3.2
3.2	DC Bridges.....	3.2
3.2.1	Wheatstone bridge.....	3.3
3.2.2	Guarded Wheatstone bridge.....	3.6
3.2.3	Kelvin's Bridge.....	3.11
3.2.4	Kelvin's double bridge.....	3.13
3.3	AC Bridges.....	3.16
3.3.1	Measurement of capacitance.....	3.18
3.3.2	Measurement of inductance.....	3.23
3.3.3	Measurement of frequency.....	3.30
3.4	Errors And Compensation In AC Bridges.....	3.43
3.4.1	Sources of errors.....	3.43
3.4.2	Compensation of errors.....	3.43
3.5	INSTRUMENTATION AMPLIFIERS.....	3.45
3.5.1	Three amplifier configuration.....	3.47
	Short Questions And Answers.....	3.49
	Review Questions.....	3.57
	Unsolved Problems.....	3.58

**CHAPTER 4: TRANSDUCERS FOR MEASUREMENT OF
NON-ELECTRICAL PARAMETERS**

4.1	Transducers.....	4.1
4.1.1	Basic requirements of a transducer.....	4.2
4.1.2	Classification of transducers.....	4.3
4.1.3	Selection of transducers.....	4.5
4.2	Resistive Transducers.....	4.5
4.2.1	Potentiometer.....	4.6
4.2.2	Strain Gauges.....	4.15
4.3	Inductive Transducers.....	4.24
4.3.1	Linear Variable Differential Transformer (LVDT).....	4.26
4.3.2	Rotary Variable Differential Transformer (RVDT).....	4.31
4.4	Capacitive Transducers.....	4.31

4.4.1	By variation of overlapping area of plates	4.32
4.4.2	By variation of distance between the plates	4.35
4.4.3	Differential arrangement.	4.36
4.4.4	Advantages, disadvantages and applications of capacitive transducer	4.38
4.5	Piezoelectric Transducer	4.39
4.5.1	Expression for output voltage.	4.41
4.5.2	Modes of operation of piezoelectric crystals	4.42
4.5.3	Equivalent circuit of piezoelectric transducer.	4.43
4.5.4	Advantages, disadvantages and applications of piezoelectric transducer	4.43
4.6	Hall Effect Transducer	4.44
4.6.1	Conceptual diagram of Hall effect transducer	4.45
4.7	Measurement of Pressure	4.47
4.7.1	Pressure - Definition and its units	4.47
4.7.2	Classification of pressure measuring instruments.	4.49
4.7.3	Measurement of pressure using electrical transducers	4.51
4.7.4	High Pressure Measuring Transducer.	4.60
4.7.5	Low pressure measuring transducers	4.62
4.8	Measurement of Temperature	4.65
4.8.1	Temperature - Definition and its units.	4.65
4.8.2	Classification of temperature measuring instruments.	4.66
4.8.3	Measurement of temperature using electrical transducers.	4.67
4.9	Measurement of Displacement.	4.77
4.10	Measurement of Flow	4.79
4.10.1	Turbine meters.	4.79
4.10.2	Electromagnetic flow meter	4.80
4.10.3	Hotwire anemometers	4.83
4.10.4	Flow meter using thermistors	4.84
4.10.5	Ultrasonic flow transducer	4.85
4.11	Measurement of Angular Velocity	4.88
4.11.1	Electrical tachometers	4.88
4.11.2	Digital methods	4.93

4.12	Digital Transducers	4.100
4.12.1	Optical encoders	4.100
4.12.2	Resistive digital encoder	4.101
4.12.3	Shaft Encoder or Spatial Encoder	4.101
4.13	Smart Sensors	4.103
4.13.1	General architecture of smart sensor.	4.104
4.13.2	Block level design considerations for smart sensor	4.105
	Short Questions And Answers	4.107
	Review Questions	4.128

CHAPTER - 5: DIGITAL INSTRUMENTATION

5.1	Analog To Digital Converters	5.1
5.1.1	Successive approximation method	5.2
5.1.2	The staircase ramp type	5.3
5.1.3	Servo tracking ADC	5.5
5.1.4	Ramp type (or) Single slope ADC	5.5
5.1.5	Dual slope integration type ADC	5.7
5.1.6	Voltage to frequency converter (or) Integrating type ADC	5.10
5.1.7	Delta pulse modulation ADC	5.12
5.1.8	Continuous balance (or) servo balancing type ADC.	5.14
5.1.9	Flash (or) parallel comparator ADC.	5.14
5.1.10	Characteristics of ADCs.	5.16
5.1.11	Comparisons of analog to digital converters (ADC).	5.18
5.2	Sampling	5.19
5.3	Digital To Analog Converters	5.20
5.3.1	Binary Weighted Resistor DAC	5.21
5.3.2	R-2R Ladder	5.22
5.3.3	Inverted R-2R ladder DAC	5.24
5.3.4	Characteristics	5.25
5.4	Errors	5.29
5.4.1	Accuracy and resolution.	5.29
5.4.2	Offset error	5.29
5.4.3	Gain error	5.29
5.4.4	Differential Non-Linearity (DNL) error	5.30

5.4.5	Integral Non-Linearity (INL)	5.31
5.4.6	Quantization error	5.32
5.5	Measurement of Voltage	5.33
5.5.1	Digital Voltmeter (DVM).....	5.33
5.6	Measurement of Current	5.48
5.6.1	Digital Ammeter.....	5.48
5.7	Measurement of Frequency	5.49
5.7.1	Digital Frequency Meter	5.49
5.8	Measurement of Phase	5.51
5.8.1	Analog phase meter / voltage addition phase meter	5.51
5.8.2	Digital phase meter	5.53
5.9	Digital Storage Oscilloscope (DSO)	5.56
5.10	Data Loggers	5.58
5.11	Basics Of PLC Programming.....	5.61
5.11.1	The Structure and Features Of Programmable Logic Controller	5.61
5.11.2	PLC Programming Combinational Logic.....	5.64
5.11.3	Ladder Diagrams	5.70
5.11.4	Mnemonics	5.86
5.11.5	Timing Instructions	5.88
5.11.6	Counting Instructions	5.97
5.11.7	Internal Relays.....	5.103
5.12	Introduction to Virtual Instrumentation.....	5.109
5.12.1	Evolution of virtual instrumentation.....	5.109
5.12.2	Architecture of virtual instrumentation	5.110
5.12.3	Virtual instruments versus traditional instruments	5.112
5.12.4	Virtual instrumentation in the engineering process	5.113
5.12.5	Labview	5.114
5.12.6	LabVIEW for virtual instruments	5.116
	Short Questions And Answers.....	5.119
	Review Questions	5.136
	Model Question Paper.....	1-3
